Solid Waste Disposal Fee Exemption for Uninhabitable Dwelling

Section 17-18 (c) of the Pittsylvania County Solid Waste Disposal Ordinance provides for an exemption to the Solid Waste Disposal Fee for Uninhabitable Dwellings. An uninhabitable dwelling is one that is not suitable to live in. The Building Official will determine that a dwelling is eligible for the fee exemption if it is found to be uninhabitable due to conditions such as the following:

- No heating system
- No functional water or sewer system
- Not structurally sound or safe for human occupancy
- No operable electrical system of a disconnected electrical meter

The determination of inhabitation will require a site visit by a Building Inspector.

Please note that a livable dwelling that is currently vacant is not eligible for the fee exemption because it could be occupied at any time.

Please submit the completed application form and payment to the Building Inspections office.
